Response to Arguments

Applicant's arguments filed 3/17/04 have been fully considered but they are not persuasive.

The examiner has acknowledged that claims 1-15 and 17-19 have been cancelled.

The applicant argues that the prior art of record doesn't teach the limitation "no spring force is provided to encounter or be encountered by said magnetic field", in which was addressed in claim 19 in paper 5 on 1/21/04, now is incorporated to claim 16 in paper 7 on 3/17/04. The examiner respectfully disagrees because the prior art of record depicts that there is no spring force is provided to be encountered or encounter by said magnetic field (see figure 6c of Holshouser's reference).

Therefore, the rejection under USC 112 of cancelled claim 19 has been withdrawn. The newly amended claim 16 in which incorporates the limitation of canceled claim 19 would be rejected under USC 102. See detail rejection below.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Holshouser et al (US006151486A).

Art Unit: 2682

Holshouser discloses a cellular phone comprising:

A housing and a cover rotatably attached to the housing and activated, directly or indirectly, by a button (see figure 5), said controller activating circuits to create inducement (see column 2 and lines 23-37);

A device mounted on the cover actuated by said inducement to rotatably move the cover relative to the housing (see column 2 and lines 38-59, see figure 6 and item 60b); wherein

Said controller activates circuits to create a magnetic field to inherently repel said device, which in turn rotatably moves the cover from the cover from a closed position to an open position.

no spring force is provided to be encountered or encounter by said magnetic field during open position (see figure 6c).

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
